We specialize in solving your problems in the most cost-effective manner. ...and saving your production lines from lengthy downtimes ...

For 30 years we have been serving our customers with the very best in hydraulic repairs and customization.

We specialize in repair, remanufacture and custom building of various hydraulic cylinders , especially those which may no longer be readily available. A custom remanufacture can often be more cost-effective as well as specifically designed

We take pride in our expertise to customize a product to solve your specific problem.

to enhance a customer's current operating system.

We understand that time is money to our customers. One hour of downtime can cost thousands of dollars in production. Our expertise and customer service attitude can get you up and running when production is your priority.

We not only respond to major production concerns, we are also available for your scheduled production maintenance. When your equipment needs to work, we work as your partner to "make things happen."

No job is too big or too small...

Custom Hydraulics & Machinery, Inc. can machine new cylinder barrels; rods; pistons; or rebuild your existing cylinder with new seals...we even provide the seals.

We serve a variety of industrial, government and personal hydraulic machining spectrums including:

- **Papermills**
- **Construction**
- **Agricultural**
- **Logging & Wood yards**
- **Food processing**

From 1 1/2" bore up to 18" bore cylinders...let us serve your hydraulic and machinery jobs.

No cylinder is too big or too small...we handle them all.
